

USA Hosts *Green Initiatives*

USA Hosts has a long-standing tradition of giving back to the communities it serves. Just as our dedication to superior customer service sets us apart from other Destination Management companies, our commitment to community involvement enables us to truly understand the needs of our customers and neighbors.

With regard to helping the environment, we encourage clients to consider soy ink and recycled paper for all printing with a soy based binding material, use of Hybrid vehicles, when available, the use of recyclable cotton bags for attendees, organic meals and locally grown food from restaurants and caterers. Additionally, we support caterers and suppliers who utilize cloth napkins as opposed to paper, recyclable centerpieces and LED lighting, whose energy efficiency is well documented. We want to make a difference for the environment by pursuing a wide range of initiatives that promote environmental responsibility and sustainable business practices.

- ❖ Sourcing a large selection of environmentally friendly products and services through local vendors and nationally recognized suppliers.
- ❖ Providing relevant recycling services for our clients.
- ❖ Implementing recycling programs within our own offices while promoting in the community.
- ❖ Educating customers and employees about environmental issues.
